NO. 36.

A Colorado Mining Town.

From the New York Tribune.
Another mining town of Colorado is growing up like a mushroom, and is appropriately called "Booming" Breckenridge. A resident says of it: "No one who does not wish to be involved in the whirl of excitement should visit this town. It has taken the leading Methodist preacher of Colorado off his feet and made him a mine speculator and real estate agent. Fancy the situation. Last evening the regular weekly prayer meeting was held, and at least four persons waited for its close to see Father Dyer about some mining claims that he was acquainted with, to get his opinion. This morning he accompanied a party on an 8-mile trip on foot to show them the 'prospects.' The snow is rapidly disappearing, and ground that has been hidden for months is becoming bare and open for prospecting and mining. The resources of merchants, hotels, mechanics, and stage companies are being taxed to their utmost capacity, and still there is no let up."

Preserving Meat by Injection.

Prof. Wickerbimer, the celebrated taxidermist attached to the Anatomical Museum of Berlin, has just discovered a liquid which, injected into the veins of dead meat, not only preserves it for several weeks from decay, but keeps it perfectly fresh and in possession of its natural flavor. Having treated a slaughtered calf with his new preparation, and subsequently caused it to be exposed to the air and weather changes for a fortnight, hanging in the open front of a butcher shop, he invited a select party of scientific celebrities to partake of the meat thus treated, providing for them, however, other viands in case the prepared meal should fail to suit their palates. The Professor's guests, however, found his piece de resistance so toothsome and delicate that they confined their attention to it exclusively, neglecting all the other solid items in his menu.

Interesting to Deaf People.

A gentleman formerly connected with the Philadelphia *Ledger* is reported to have discovered a simple form of audiophone, which he has tried with satisfactory results, although he is very hard of hearing. A few days ago he was explaining the principle of the audiophone to some of his friends, and to illustrate his remarks put a folded newspaper between his teeth, bending it over in the form of an audiophone. To his surprise he found that he could hear as well with the newspaper as with the audiophone. He subsequently attended an auction sale, and putting the catalogue between his teeth and bending it down with one hand, heard all that was said, although without some such contrivance he could hear nothing.

WHAT IT COSTS.

Reno merchants have things spoiling on their hands which would be sold if folks knew where to get them or were reminded of them. Every few days some of the grocers throw away provisions enough to keep a family, which they might have sold if they had put a line in the GAZETTE or Journal, at a cost of two or three bits. The stores often get in things which twenty people would buy if they knew just where they were coming, but through lack of energy nothing is said to awaken an interest in them. It costs more to study and industry to become a good advertiser, than it does in money, but it pays.

EDITORIAL NOTES.

It is announced that Representative Daggett will shortly introduce a bill requiring the immediate survey of all unentered railroad lands, in order that they may be taxed. The survey of these lands would not, however, subject them to taxation. Under the United States laws only those lands which have been patented can be taxed. Much of the land included within the railroad grants is at present worthless, and to subject it to taxation would be practically a confiscation of the grant.

This morning's "Truckee Republicans" has the new editor's good morning. Senator Watson says his aim is to make an honest living. "The policy of the paper will be to faithfully represent the best interests of the section in which it is published. The paper will be run at a local paper, representing local interests, and not as a political organ representing any political party. It will not dodge any question, but will fairly and fearlessly discuss all issues of interest to the people."

Gustave Poetz died in New York last summer, and his wife had his body embalmed and laid away in Greenwood cemetery. Mrs. Poetz recently went to live in Germany. Her daughter has had the remains cremated in the Le Moyne furnace at Washington, Penn., and is on the way with her father's ashes to join her mother.

The Carson Appeal thus complimented the ladies of Reno: "The Twights of this city and the Amitie Club of Reno, two social organizations, propose to join each other in a social affair at the Opera House some evening next week. Reno will furnish the beauty and Carson the brains of the affair."

It is alleged that E. B. Washburn is not so good a friend to Grant as he has been supposed to be. When Washburn has been asked about the Presidency he has always declared himself a warm supporter of Grant. Now it is stated that Washburn has been intriguing to secure the Presidential nomination for himself.

The tramps in Eastern Nevada have adopted a novel mode of travel. They descend the Humboldt river on rafts. They can start for east on the Humboldt division of the overland journey, and run down stream for 300 miles to the sink of the river. This method of travel just suits the tramp.

The following is a copy of a note picked up in the streets of New York, and published in the Sun under the heading of "A Jewel of a Wife."

DEAR HUSBAND: Please send me 25 cents; I had to get fish and oil, and I want to get some soap to make Mary an apron, excuse haste.

RONALD.—JULY.

They say that the up-town hotels in New York are at the present moment so crowded with mining men that in one of these establishments a notice has been posted: "No miners received for board!"

The Gold Hill News says it has not and does not favor the nomination of either Grant or Blaine, believing that Washburn or Sherman would be much stronger and surer of success.

In Sweden, a man who is seen drunk four times is deprived of his vote at elections. The adoption of that principle would greatly restrict the franchise in this country.

T. D. Edwards, of Carson, is one of the delegates to Chicago elected by the Austin Convention. His name

was omitted in our yesterday's telegram from Austin.

It is not certain when Congress will adjourn. It may last until the middle of June, although Randall hopes to see it adjourn before the end of the present month.

The Democratic States want Grant; the Republican States want somebody else. That is the result of the canvass so far in a nut shell.—New York Tribune.

Tom Scott, the "Railroad King," has retired from business, owing to ill health.

TERIBLE TEMPESTS.

Fearful Wind Storms in Illinois and Ohio.

CHICAGO, May 10.—A fearful cyclone swept across the eastern part of McLean county last night, damaging property at least \$100,000. In Arrowsmith township twelve dwellings were utterly demolished, and a 160-acre orchard eradicated. In Emporia township the damage was nearly as wide spread, and many persons were injured. The home of Edward Rees was destroyed, and Mr. and Mrs. Rees lifted in their bed and carried a quarter of a mile and set down in a wheat field. A child of Mr. Keets had its skull fractured and will die. The track of the cyclone was three-quarters of a mile in width. The town of Guthrie, which is a station on the Springfield division of the Illinois Central Railroad, and which contains only half a dozen houses, was struck by lightning and everything destroyed by fire. No one was hurt. There was a furious wind, and the lightning was brilliant and continuous throughout the whole central part of the State. Many towns and farms were flooded.

HEAVY STORMS IN OHIO AND INDIANA.

CINCINNATI, Ohio, May 11.—A heavy storm of rain and hail passed over this city at midnight accompanied by much lightning. Specials to the "Gazette" say that the windstorm this afternoon did much damage in various places north of Cincinnati. At Union City, Indiana, something like a tornado prevailed, blowing down the agricultural works of J. L. Hartsell, the planing mill owned by Anderson, spoke and hub factory of S. C. Carter, the butter-tub factory of Hook Brothers, and a number of other buildings. Near Mount Gilead, Ohio, the storm blew down trees and destroyed much fencing. At Ashland, Ohio, the roof of the City Hall was carried off a distance of 200 yards. Near West Jefferson, Ohio, lightning struck the barn of Jacob High, burning it and contents and killing Henry Dans, who had taken shelter there. The day had been very warm and close.

WALKING WOMEN.

The Six Days' Go-As-You Please Pedestrian Match in Petticoats.

SAN FRANCISCO, May 11.—The six days' match for women now in progress at the Pavilion, is becoming of absorbing interest. Miss Amy Howard and Madame Tobias are so near that either is afraid to go off the track for fear of the other making a spurt and causing a gap that would be hard to fill. One is never seen on the track without her opponent close at hand. During yesterday they were off the track just five hours and forty-five minutes. The best time ever recorded for a women's six days contest, was 302 miles, made by Amy Howard in New York. It looks as though that score will be exceeded in the present race. The contest will close at 11 o'clock this evening. Alice Donnelly and Millie Young have surprised every one by their excellent walking, and Tourtillot is not far from Young's heels.

Wind Stories From Our Truthful and Enterprising Contemporaries.

From the "Truckee Republican." Monday was the windiest day of the season. A hand car with Ed. Murray and three men started for the snow-sheds Monday to repair an old snow-plow which was damaged by the storm. On returning the wind was so strong that they had to get off the hand car and push it down hill. Tough but true.

From the "Virginia Enterprise." The Chinese utilize almost everything that comes along. This was strikingly illustrated yesterday during the cold. While boulders and ice bergs were flying through the air and water pipes were being ripped out of the ground, an old Chinese man with spectacles on his nose, was observed in the eastern part of town seated on a knoll calmly fixing his kitchen fire shovels with a long chain for a tail.

A six-days' trial of the speed and endurance of men and mustangs began in San Francisco, yesterday afternoon. The terms of the race provide that the riders shall be in the saddle 15 hours each day, and shall have no assistance in mounting or dismounting from their mustangs. As many horses may be used as the rider chooses. There are seven entries already made, which are as follows: M. Anderson of Santa Clara; C. Mattheisen of San Francisco; Juan Lopez, a vaquero; M. J. Reyes, a Mexican ranger; J. R. Reilly and F. F. Derrick. A purse of \$2,500 is offered to the winner.
